**Indicative fee:** \$11,500 per semester

**Campus:** External

**Duration:** 3 semesters full-time or 6 semesters part-time

**Semester of entry:** February, July and November

## Graduate Certificate in Research Commercialisation (IX97)

**Indicative fee:** \$11,500 per semester

**Campus:** External

**Duration:** 1 semester full-time or 2 semesters part-time

**Semester of entry:** February, July and November

### Program objectives:

These courses are designed for research students, researchers and professional managers of research.

The Graduate Certificate in Research Commercialisation is designed to develop the skills and capacity to identify the commercial potential of your research. This includes the development and implementation of a strategy and business plan for commercialisation. You may also choose to develop skills in project managing your research, leadership, entrepreneurship or managing your research career. You can also build knowledge foundations in research and development (R&D) management and the relationship between research and public policy.

The Master of Research and Development Management is particularly suited to current or aspiring research and development leaders, administrators and active researchers in corporations,

universities and the public sector. The Masters builds on the content of the Graduate Certificate and allows you to develop a deeper understanding of the context and strategic issues involved in R&D management. You can tailor the course to your needs by applying these ideas and concepts to issues of relevance to you, and where possible, undertake assessment through workplace-based projects.

Students enrolled in the Masters level course can choose to exit with an award of Graduate Diploma in Research and Development Management following the completion of eight approved units.

### Why choose QUT for research coursework programs?

Online delivery of material makes these courses ideally suited to busy students or professionals and provides an opportunity to develop global career networks. This environment allows students to share experiences and best practice under the guidance of expert online moderators. Access to the latest thinking and trends can help you face the challenge of operating in the context of a rapidly

changing global research environment. You may also encounter opportunities to develop international research linkages and collaborations.

These courses are cross-institutional awards offered through the e-Grad School across the five Australian Technology Network universities.

### Academic entry requirements:

Applicants for the Graduate Certificate or the Master of R&D Management should normally possess a four-year undergraduate degree or a three-year undergraduate degree plus either an Honours year or postgraduate coursework year in any discipline.

Applicants who do not meet these academic requirements may be eligible to enter the course on the basis of professional activities completed in research management, research commercialisation or related fields.

### Further information
